Choose Your Vanity in Just 6 Steps

1. MEASURE YOUR SPACE

Do a simple sketch of your bathroom and add dimensions of walls, windows, doors, plumbing pipes, and electrical points to help visualise your space and how your new vanity will fit into it.

2. PICK A VANITY STYLE

Ask instore to get an idea of which vanity styles are right for you. Some vanities are better suited to large bathrooms, while others are tailor made for small spaces. Regardless of how big your bathroom is, Timberline has a huge range of wonderful options for you to choose from.

What Makes Our Furniture Special?

Tongue And Groove Jointing

All the solid backs and bases are assembled with a tongue and groove joint with multiple cam fix points. This creates exceptional strength and durability, particularly for wall mounted cabinets. The tongue and groove joint prevents the side from pulling away from the back when pressure is placed on the vanity top.

Solid Vanity Back

At Timberline we always use a full 16mm solid back. This ensures the greatest stability for our vanities and makes mounting and installing a breeze. We never use a 3mm paper lined MDF back.

Soft-Close Hinges

Only the best European fully adjustable hinges are used. This allows them to be easily adjusted and offer a long life span. All hinges include built in soft-close mechanisms.

Construction Brackets

Specially designed internal brackets make a neat and strong finish.

Moisture Resistant Board

All our cabinets are manufactured with Moisture Resistant (MR) Board. This gives you the best protection against swelling and other moisture damage. All our board is sourced from responsible, certified suppliers, and is an "E0" low formaldehyde eco-friendly product.

Durable Edging

The edging on our woodgrain cabinets is a strong ABS with matching grain. This means you will get years of durable service from your new woodgrain cabinet.

- All wall hung, floor standing and on legs vanities/tallboys must be mounted to the wall.
 - Please check thoroughly prior to install. See install instructions.
 - During the framing and rough in stages of construction ensure that there are sufficient fixings for the mounting of the vanity cabinet. There should be at least two vertical studs for fixing provided not more than 100mm from each edge of the cabinet.
 - Ensure that the wall is straight and plumb and free from any bow or twist otherwise the drawers and doors will be out of alignment.
 - The solid back of the cabinet must not be damaged, removed, cut or drilled more than is necessary for the access of the plumbing pipes.
- During installation the cabinet should be fixed with screws through the solid back of the cabinet. The screws should be suited to the stud material and have a pan or counter sunk head. Provide a horizontal row of screws within 100mm vertically from the top of the cabinet at a maximum of 300mm horizontal spacing. The screws closest to the left and right edge of the cabinet should be within 100mm of each side.
 - Prior to fixing the top to the cabinet with silicone ensure that the cabinet is level and plumb in all directions. If not remove the cabinet and pack or straighten the wall accordingly.
 - After installation use the adjusting screws of the hinges and drawer runners to align the doors and drawers.

CARE INSTRUCTIONS

For all surfaces use only a soft cloth and a weak solution of a non-abrasive cleaner. Do not use any abrasive, acid or alkaline based cleaners. A moist micro fibre cloth will give you best results. Avoid sharp objects and keep heat and hot objects away from tops.

Cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage. Care must be taken to immediately dry any condensation spillage or water leakage that may gain access to the cabinet.

To keep your bathroom furniture looking sparkling bright and for minor scratches to mineral composite or painted surfaces ask about our Timberline 3 Dimension Cleaners.
